## E. COLEMAN CONSIDERS VILLAGE INCORPORATION

The annual meeting of ratepayers of East Coleman and Blairmore Road held in the Polish Hall, Sun. Feb. 15 decided to investigate the possibility of incorporating into a village. The executive was instructed to contact W. Kovach M.L.A. to get further information on this matter.

This consideration was reached after consideration of the report of secretary P. Meroniuk, outlining the negotiations with the Coleman Town Council for incorporation into town. It was pointed out in the report that a great deal of work and discussion took place on this matter but no agreement was reached and the Town Council decided to leave this question in abeyance.

### Report on Bridge

In his report to the meeting the secretary stated that although the ratepayers of East Coleman and Blairmore Road originally organized for the purpose of incorporating into the town of Coleman, a greater interest has been aroused in the many problems which confront the community. The committee made progress on the matter of the bridge across the river. The chief engineer of bridges inspected the bridge and agreed that it was unsafe and hazardous to pedestrian traffic. The engineer agreed that the present location for the bridge is not good and that the proposed new right on 3rd Street would be more suitable. The secretary further pointed out that there is a need street and house numbering and full satisfaction of drainage and building culverts.

After a lively discussion on the report it was decided that the executive investigate the matter of house numbering, road and culvert repairs, safety signals for the railway crossing and firefighting.

The following executive was elected to carry out the work for next year:

Pres. E. Churla  
Vice-Pres. M. Dunford  
Secretary P. Meroniuk  
Committee members: J. Kryczka, Sr., B. Sobersaj and S. Lisak

Auditing Committee. W. Badzioch and J. Bozek.

### Nominate Hosp. Candidates

Representatives from Willow Drive joined in the meeting to discuss some of the problems that confront both communities. The matter of firefighting was discussed and committee instructed to contact firechief Montalbetti with the view of training an auxiliary firefighting team for East Coleman and Blairmore Road.

The opinion of the meeting was that it is time the west end of the improvement district had representation on the Hospital Board, and nominated Mrs. Molly Golibowski and Mr. S. Mraz to contest the next election.

## Merchants Elect New Officers

At their regular meeting in the Council chambers Thursday, Feb. 12, the Coleman Retail Merchants Association elected their officers for the 1953 season. All offices were filled by acclamation.

President, J. Allan, Jr.  
Secretary-treasurer, W. Holyk.

## Light and Water Co. Not Sold To Calgary Power

Rumor has been circulating around town that Coleman Light and Water has been sold to Calgary Power. This is absolutely false, the company merely adopting a reduced rate that is similar to the rate used by Calgary Power.

The Coleman Light and Water is still locally owned benefiting local people.

## Stores Will Close On Day of Annual Rodeo

Coleman Retail Merchants Association displayed a great show of co-operation at their Thursday, Feb. 12 meeting. Resulting from their actions was the decision to close their stores the day of the annual Coleman Rodeo and to remain open on May 1.

These decisions followed and complied with discussion settling matters regarding the regular Monday closing.

At the start of the meeting, secretary Wm. Holyk read a letter from the Coleman Board of Trade. This letter told of the annual Coleman Rodeo on July 4 and the plan for an anniversary week. The board was desirous of knowing the Merchants' intentions regarding closing for the rodeo.

Mr. Holyk stated that it was true that the association had overlooked the fact of a 3-day holiday should a holiday fall on Saturday. This condition only happens on a rodeo day and very seldom on National Holidays.

Nevertheless it does happen. To alleviate this condition he suggested that the stores should open on the Monday following the Saturday holiday instead of the Monday prior, and amend the bylaw accordingly. At this time he declared the matter open to discussion.

It was moved by Aldo Montalbetti that the council be asked to redefeat the bylaw to include provision to eliminate the possibility of a three-day holiday.

The merchants went on record to close on Rodeo Day in order that personnel involved with the rodeo would not be hampered by business should they remain open.

Christmas closing hours was introduced to the meeting by A. Montalbetti. Secretary Holyk informed the assembly regarding the rule as covered in the Alberta Early Closing Act. The act explains that 7 days prior to Christmas, closing bylaws were not applicable, and that the merchants should follow much the same pattern as set by the large centres. If a merchant desires to remain open late he would advertise the fact individually.

Discussion was held regarding the holiday on May 1. It was felt that as this was not a statutory holiday and seeing that it would conflict with the Monday closing, the merchants would remain open for business on Friday, May 1 and observe the regular Monday closing on May 4.

Rounding out a successful and enlightening meet, the merchants were addressed by Mayor N. E. Abousay. Mr. Abousay clarified the commercial light rates and pointed out that some of the advantages for merchants who were heavy power consumers.

## JUST ASK THE EXPERTS

Quiz programs, like cross-word puzzles and detective stories, are a popular form of entertainment for a great many people—especially when the listeners, with their questions, can put the experts on the spot and get prizes for doing so. That, broadly is what happens on "Now I Ask You," heard every Thursday on the Trans-Canada network. Pictured from left to right are quizmaster J. B. McGeachy; the show's producer, Jim Kent; James Bannerman, writer and critic; Ralph Allen, magazine editor; and, at the far right, author Morley Callaghan. Callaghan and a guest team up to outwit Allen and Bannerman on each program, and McGeachy fires the questions.

## Elections To Be Held March 2nd

Elections for both council and school board will be held March 2nd as a result of nominations here Monday.

George Jenkins and Angelo Toppino completed their 3 year term of office this year. Mr. Jenkins not standing for re-election. Nominated to contest the vacancies were Bert Bond, E. W. Derbyshire and A. Toppino.

W. White was returned as Hospital Board representative by acclamation.

Four nominations were received to contest the three vacancies on the school board. C. Clarke, M. Dunford and A. Wilson having completed a 2 year term. Nominated were C. Clarke, John Bayon, Steve Penny and Ronald Crippen. Nomination papers for M. Dunford arrived after the closing time and were not accepted.

## Val Kay Wins Waterton Meet

Val Kay continues to add honors and add favorable publicity to the town of Coleman as the winter ski competitions continue. His latest triumph being winning first place at the recent Waterton Ski Meet.

At the Waterton Tourney, Val won the Men's Slalom, competing against 32 competitors, and placed second in the men's downhill. His combined times for the two events gave him the honor of first place in senior men's competition.

Val was born at Chipman, Alta. 26 years ago and started skiing with the Kelowna ski club at the age of 21. It is just of late that he has begun competitive skiing.

Moving to Coleman in 1948 he joined the Crows Nest Pass Ski club and has entered competitions at Blairmore and Waterton. It is his desire to receive his instructors certificate and hopes that he may again begin the three year course this season. It is necessary that he attend a short course at Sunshine Ski Lodge, Banff, for a couple of weeks each year for three years.

Employed at the International Mine here, Val married the former Janet McCulloch and has one daughter.

People shop where they are invited—that's why it pays to

## Lions Offer Grade 11 Scholarship to School

The School Board at their regular meeting Wednesday, Feb. 11 learned that the Coleman Lions Club are prepared to award scholarships to those three students with the highest standing in Grade 11. His completes the awards in the Coleman High school, with other scholarships awarded by the Board, the Elks, and the O.O.R.P.

The following letter was received from the Lions:  
The Secretary,  
Coleman School District.  
Dear Madam:

We regret your letter of Oct. 14, 1952 was inadvertently mislaid and only came up for discussion at our meeting last night.

The general feeling of members was, that an award such as suggested had a definite place in school training today and to encourage and give incentive to the Grade 11 class we are pleased to propose awards as follows for the year 1953:

To the student attaining the highest standing \$25.00.

To the student attaining second highest standing \$15.00.

To the student attaining third highest standing \$10.00.

The matter of suitably informing the pupils of the class mentioned will be left in your hands.

Yours truly,

J. R. Hill, president.  
Following the discussion regarding this scholarship the board made a motion that the School Board scholarship be divided three ways rather than split between the highest girl and the highest boy as previously.

P. Dececo reported on the bus and stated that the drivers were not getting the same mileage. He attributed this to winter conditions.

Mr. Allen in his monthly report showed January's enrolment to be 642 with an average attendance of 95.32%. He stated that Inspector McKay had visited the school and expressed that he found everything satisfactory.

It was reported that porches on the back and front were leaking badly, and the Works and Property committee authorized to get prices for the repair.

## PEE WEE HOCKEY

In Saturday's contest in the Pee Wee League Legion won over Elks by a decisive 8-2 win and Paddisons dumped Lions by a similar score.

It has not been the policy of the hockey club to list the scorers in Pee Wee games due to the fact that team work is more vital at this age than scoring glory.

## \$5,000 Lose Estimated In Fire -- Home Destroyed

Fire destroyed the home of Mr. and Mrs. Joe Machouski in East Coleman just after midnight Monday night. Loss was reported to be \$5,000. Some insurance was carried.

The Coleman volunteer fire department attended the fire but were hampered by the lack of waterworks in the district.

## Lions Consider Scout and Cub Hall

The Coleman Lions Club are investigating the possibilities of erecting a small club room for the local Cubs and also a troop of Scouts that they hope to have formed within the next few months.

The annual drive for funds for the Canadian Cancer Society will be handled by the Lions again this year. The drive will be conducted just as soon as all organizing is completed.

## Prizes Offered For Model of Frank Slide

A model competition of the Frank Slide, open to all residents of southern Alberta has been announced by Lethbridge recreation services. Rules of the contest appear in the following articles.

A prize of substantial value, to be announced later, will be awarded for the best model, Superintendent of Recreation C. Lorne Davidson said. W. O. Martindale is to be in charge of the exhibit.

Mr. Davidson said that 1954's model contest would be of a toothpick model of the CPR high-level bridge over the coulee. Rules of this year's contest are:

It is open to anyone in Southern Alberta.

The base of the model must be no larger than six square feet, and no smaller than two square feet.

Materials that may be used include rocks, plaster of paris, stones and suitable materials for trees, roads, water, paint, and other materials deemed necessary.

The models must be delivered to the Civic Ice Centre not later than April 25. Judging will take place on April 27 and prizes awarded the first Saturday in May.

The models are to be marked with the maker's name and address. Forms for entering the contest may be obtained at the Recreation department offices in the Civic Sports Centre.

The winning model will be displayed in some prominent place, R. "Lefty" Espheter, recreation director, said, possibly in the Crows' Nest Pass in conjunction with the marking of the 50th anniversary of the Frank Slide this year.

Mr. Espheter suggested modelers could possibly obtain a good idea of what the Slide was like from a picture of it that appeared in a recent issue of Maclean's, used with an article on the now-famous tragedy. He said also post-cards available with pictures of the Slide would help to give the modeller an idea.

## CARD OF THANKS

Our sincere appreciation is extended to all the people of Coleman, the business men, Ernie Hill, J. Lowe, K. Kormer, for their most generous contributions to us in our recent sad bereavement.

—Mrs. Mary Donaldson and family.

...V...

The Journal has Model 5 Remington Rand portables in stock and students who plan on purchasing their own machines to aid in their typing classes can secure one of these beautiful machines without a moment's delay.

## Frances Dibble Will Give Concert Here

The regular meeting of the United Church Couples Club was held Sun. Feb. 8. At the meeting it was learned that the club had contacted Miss Natalie Minulise in regards a concert in Coleman before her trip to the Coronation. Miss Minulise will not be free to give the recital here, as she is booked for the season.

Miss Frances Dibble, of Toronto, daughter of Mr. and Mrs. E. W. Dibble, Coleman, will give a concert under the sponsorship of the Couples Club this spring.

Many people are already looking forward to this musical event, as Frances is a very popular girl with those who know her, as well as an outstanding singer.

The opportunity of being the agents for Mother's Day flowers of the Blairmore Greenhouses was given the club. It is hoped that anyone purchasing flowers for wives and mothers will give their orders to the club, who will receive 25% on the sales. A spring bouquet made up especially for Mothers Day, as well, beautifully artificial cemetery bouquet will be featured.

The next meeting of the Couple's club will be March 8, at which time the Senior members of the church will be honored. Plans were completed for the Box Social, Feb. 20.

Films of the 1952 Rodeo and scenes along the Kananaskis highway were shown by Evan Gushul. Lunch was served by a committee of Mr. and Mrs. E. Gushul, Mr. and Mrs. R. Woods, and Mr. and Mrs. N. McKinnon.

## Special Meetings in St. Paul's United Church

A Preaching Mission will be held in St. Paul's United Church, beginning Sunday, March 15, and continuing each week night until Fri., March 20th. The speaker for the first service will be the Rev. R. S. Christie, Associate Secretary of Evangelism for the United Church. The Missioner for the week night meetings will be the Rev. H. A. Meadows of 5th Ave. United Church, Medicine Hat.

All members and friends of the Church are invited to attend these special meetings.

## Stone Fruits and Pears In Okanagan Valley...

In the Okanagan Valley of British Columbia, famous for its apple production, there has been a trend during the last 10 years toward a greater production of stone fruits and pears. The somewhat unsettled markets for apples in recent years may have been partially responsible and may bring further increases in plantings of stone fruits and pear trees with an increased production of these fruits.

At the request of the industry the Economics Division of the Canada Department of Agriculture made a study of orchards comprising mostly stone fruits and pear trees during the summer of 1950. The objective was not only to review this relatively newer type of fruit farming, but also to supplement the apple production survey made in 1949 and thus complete the description of the post-war fruit industry in the Okanagan Valley.

Plantings of stone fruit and pear trees in the Valley has been made on such a scale since 1939 that by 1949 the production of apricots, cherries, peaches, plums, and pears have more than doubled, while pear production has increased by more than one-half. At present the domestic market absorbs the stone fruits and pears produced in the Valley.

The findings of the survey are based on the records of 107 fruit

farms comprising 1,121 acres of orchard in that section of the Okanagan Valley which extends from Kelowna to Osoyoos. It was found that the average yield in tons per acre of the various fruits was: apricots 7.6, cherries 4.6, peaches 6.9, plums 5.2, pears 8.6, pears 7.0 and apples 8.0. More than 80 per cent. of the apricots, peach, plum and pear trees, about half of the cherry trees and two-thirds of the plum trees were 15 years old or less.

On the basis of age distribution of the trees and taking account of the losses from the cold weather, the findings of the Report indicate an increase in the production of apricots in the next few years. Peach and cherry production will decrease unless better cultural practices and favorable weather conditions bring higher average yields per tree. All signs point to a continuing increase in the production of pears and a slight increase in plum and prune production.

The average acreage of orchard per farm was 10.5 acres, consisting of 1.3 acres of apricot trees, 1.4 acres of cherry trees, 2.6 acres of peach trees, 0.9 acres of plum and pears, 1.5 acres of pears and 2.8 acres of apples.

The total number of labour hours required per acre was highest for cherries with 556 hours; apricots required 469 hours, peaches 384 hours, pears 351 hours and pears 242 hours. For apricots, peaches and pears, thinning was the largest pre-harvest operation; in the production of cherries and plums, removing the brush and pruning took the most time. For all fruits the harvesting operation which required the most labour was picking—over 35 per cent. of the total labour in all cases. Picking an acre of cherries with an average yield of 4.9 tons took more than twice the labour required for all other fruits except apricots.

Net returns from an acre of apricots in 1949 were \$634.74, cherries \$875.27, peaches \$292.54, pears \$317.59. Pears showed a loss in 1949 of \$26 an acre.

### TONS OF CARPET FOR CORONATION

LONDON.—Some of the world's most impressive carpet will cover the ancient abbeys of Westminster Abbey at the Coronation of Queen Elizabeth next June.

Altogether 2,250 square yards of carpeting will be needed, weighing nearly five tons. Twelve Scottish girls in the factory of James Templeton and Company of Glasgow will spin the sixty worsted wool, and will weave the carpets.

## Funny and Otherwise

Store Collector: Are you going to pay us that past due account?  
Old Acre: Not just yet.  
Collector: If you don't, I'll tell all your other creditors that you did.

Hattie—I don't know whether to go to a palmist or a mind reader.  
Cattie—Go to the palmist, dear—you know you have a pain.

"John, didn't I hear the clock strike three when you came in last night?"  
"That you did, my dear. It was just starting to strike eleven and I stopped it so as not to disturb your sleep."

Customs official—Anything to declare, madame?  
Woman—No, not a thing.  
Custom official—Quite so. Then the fur tail hanging down under your coat is really your own?

Life is just an everlasting struggle to keep money coming in and teeth and hair from coming out.

"Where is the bookkeeper?"  
"Gone to the races, boss."  
"What?" In the middle of our annual audit?  
"Yes, sir. It was our only chance to balance the books."

Notes that milkmen find left in bottles are sometimes vague and sometimes humorous. One milkman found this one:

"Dear Milkman, we don't want milk every day. We want milk like this: Today we want milk. Tomorrow we don't. And the next day will be just like the day before and the day after tomorrow."

After preaching a powerful sermon against betting, the vicar was dismayed to learn that one of his wardens was a heavy gambler, and at once hurried round to apologize.

"Oh, don't worry about it," said the warden. "After all, it's a poor sermon that doesn't hit me somewhere."

"How long did it take your wife to learn to drive a car?"  
"It will be ten years this fall."

Helps You Overcome Itching of Piles Or Money Back

You do not have to be tortured and embarrassed by the itching soreness and burning pain of piles any longer. Here is real help for you.

Get a package of Hem-Ton, an internal pile treatment, at any drug store and use as directed. You will be pleased at how quickly your pile trouble is relieved. Only \$1.99 for the 7 or 9 day tablet package. If you are not 100% pleased after using Hem-Ton 7 or 9 days, as a test, ask for your money back, refund, or return for all drug stores.

Patterns Thrifty! Sew-Easy!

7366

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department, Winnipeg Newspaper Union, 60 Front Street W., Toronto. Be sure to write plainly your Name, Address and Pattern Number.

The greatest man-made heat is that of the carbon arc, determined at 6,369 degrees Fahrenheit. It is brighter than the sun.

5023

## Government Extends Short Term Loans

OTTAWA.—The federal government has decided to dip deeper into the short-term lending field to gain more cash with which to pay off maturing debts.

Finance Minister Abbott announced that the government's entire eight-year policy on Canada treasury bills is being changed, increasing the ceiling on such loans by \$200,000,000.

A treasury bill is a short-term loan, usually maturing in 91 days, which the government obtains by selling to the public in the commercial lending market.

Banks, insurance companies and other institutions with big amounts of money available make the loans at minimum interest rates.

The government maintained a rigid system in making these bills available to the market and kept a ceiling of \$450,000,000 on them since 1945. Now it will make the lending system more flexible and boost the ceiling to \$650,000,000.

Previously, Mr. Abbott announced that the government was entering the long-term 25-year bond market with a \$100,000,000 issue, the first in three years, preparatory to launching a much bigger one later.

Together, these two steps appeared to indicate an increasing scarcity of surplus funds in the federal treasury. The government used big budgetary surpluses in previous years to help retire maturing debt and reduce the overall national public debt.

On the short-term treasury bills, the practice since 1945 has been for the government to call for tenders in each quarter-year on six issues, totalling \$75,000,000 each and maturing in 91 days.

Thus, the total outstanding debt on this type of loan was kept constant at \$450,000,000. Mr. Abbott said.

Starting Jan. 29, however, tenders will be called weekly on \$50,000,000 worth of treasury bills. Of these, \$40,000,000 will be 90-day bills; \$5,000,000 182-day bills and \$5,000,000 273-day bills.

On April 24, the total outstanding loans in this group will be increased by \$200,000,000 to \$650,000,000.

On April 30, the total amount of treasury bills issued weekly will be reduced to \$40,000,000. This will comprise \$35,000,000 worth of 91-day bills and \$5,000,000 of 273-day bills.

TRADE OPPORTUNITY

VANCOUVER.—A new market for British Columbia's red and yellow cedar may be opened by a gift to Britain from the B.C. Lumber Manufacturers Association. A cargo of cedar recently was delivered in London to be turned into sample hutments for armed services personnel.

In Roman times May was regarded as an unlucky month for marriages.

## THRILLS of the ROARIN' GAME

### The "Knowhow" And The "Old Bean" Count In Skipping

The canny, capable skip wins many a game with "the old bean." He can make any rick he plays on a tough one to beat.

The good skip not only ably directs play, but calls for shots from his men he knows they are individually capable of making. He is also a past master at reading the ice and will take every advantage he can of "runs" or tough spots in the sheet he's playing on. Let him find a "run" and he'll try to place stones on it every end.

When he gets a stone in the house at the beginning of an end, he'll rarely attempt to guard it, but will try to get a second counter in the circles. He knows that the "second" is a much easier shot for his man to make, and that the laying of a perfect guard is the hardest shot in the game. Then too, a guard can never be marked on the score board, regardless of how well it is played.

Our good skip is also aware that psychology plays a part in every game, and he uses it at every opportunity. He knows that the opposing skip is playing at least one shot ahead. In other words, planning shots on eventualities as the "end" stacks up.

Our skipper may play a shot that's not the obvious one; like taking out a second instead of playing for the shot rock. He may also make other plays, at his expense to his own rick, that will tend to disrupt the opposing skip's line of thought and start him to wondering if he's being outsmarted. Once the other skip thinks along those lines, his confidence is being undermined and he may, in confusion, call for the wrong shot. It has happened, and for that reason skipping a rick calls for a lot of concentration on the part of the player.

Another thing a good skip will do is to size up the ability of the individual members of the opposing team. If he detects weaknesses in their respective skill in making particular shots, he'll play on that as much as possible. The out-turn being the more difficult of the two to throw, he will try and force the opposition to use it as much as he can.

Playing the percentage in every shot is something to which a good skip is entirely devoted. He plays the one with the greatest possibilities, and never passes up the chance to play two or three shots in one, to either words, if his man misses.

Rheumatic PAIN

Good news for those who long for relief from rheumatic pain, but feel hopeless! Thousands get speedy relief from rheumatic and arthritic suffering by using BLUE BONNET's T-R-C's. Don't let dull, weltsome aches and sharp stabbing pains handicap you any longer. Try Templeton's T-R-C's today. Only 65¢. \$1.35 at druggists. T-344

BLUE BONNET Margarine is sold in the regular economy package with color wafer. Also in the famous YELLOW Quik bag for fast, easy color.

87-4

the main objective of the shot, he can still make another that may be almost as good.

When the stones are working good and the breaks are showing in favor of our real skip, he'll play his luck to the limit and make the most of every situation. His game will be wide open with lots of stones in the house; so if the good breaks continue and the opposing skip happens to miss at the right time, he'll have a house full of counters.

If he senses that the breaks are going the other way, he'll tighten up and play a very conservative game. Plenty of rocks up in front, with draw shots and raises being played almost exclusively.

More than one-fourth of all housing costs are devoted to utilities, gas, electricity and water.

### Worry of FALSE TEETH Slipping or Irritating?

Don't be embarrassed by loose false teeth slipping, dropping or wobbling when you eat, talk or laugh. Just apply a little FASTERTEETH to your plates. This pleasant, odorless, and accurate remedy is holding plates in place, with no gum, no sticky, putty taste or feeling. It's alkaline (non-acid). Get FASTERTEETH at any drug store.

Folks sure favor a MAGIC cake!

SELF-ICED SPICE CAKE

Mix and sift 3 times, 2½ c. once-sifted pastry flour (or 2 c. once-sifted hard-wheat flour), 2½ tsp. Magic Baking Powder, ½ tsp. salt, 1½ tsp. ground cinnamon, ½ tsp. each of ground cloves, ginger, allspice, nutmeg and mace; mix in ¼ c. melted and dried seedless raisins and ½ c. chopped walnuts. Cream ½ c. butter or margarine and blend in 1½ c. lightly-picked brown sugar; beat in 3 well-beaten egg yolks and ½ tsp. vanilla. Add dry ingredients to creamed mixture alternately with ½ c. milk and spread batter in 9" square pan, which has been greased and the bottom lined with greased paper. Beat stiff, not dry, 3 egg whites and a few grains salt; gradually beat in 1 c. lightly-packed brown sugar and spread over cake; sprinkle with ½ c. chopped walnut and bake in a rather slow oven, 325°, 1½ to 1½½ hours; cover lightly with brown paper for last half hour.

## Two Defences For a Defenceman

This week it's a tip for defencemen. It's a technique used by all good defencemen in the N.H.L., and should be developed by you if you are to hit the top in your league. If you watch a top notch defenceman in the N.H.L. you will notice that he has two lines of defence, whereas the average player only has one line of defence to fall back on. Here's how it works:

A defenceman should use his stick as his first line of defence. He does this by holding his stick in one hand well out in front of him. By having his stick out in front of him like this he is able to knock the puck away from the puck carrier. As he is doing this he is skating backwards always keeping in front of the puck carrier and watching him carefully. If the puck carrier, by a stick-handling trick, gets the puck past the defenceman's stick, the defenceman then uses his second line of defence and plays the man. By "playing the man" we mean that you for-

get about the puck and concentrate on taking the man out of the play with a bodycheck or by skating with him. You should all remember that a good defenceman, in most cases, plays the man thus, even though the puck gets past him, he stops the opposition from going after it.

An exception to this rule is when the puck is shot into your end zone or is loose inside the blue line area. Then, if you are close enough you should try to get that puck first, if you have it they can't score. Don't forget, in such cases, go back and get that puck! Try this type of checking and we're sure you will be a lot harder to beat.

### "Guarding"

One of the most important fundamentals of basketball is "guarding". If you know how to guard an opponent properly you will be a valuable addition to any team, and will increase your rating as an individual player! Here are two things to remember:

First—never let the player you are guarding get between you and his basket. If you keep between him and his basket he will never have a clear, unhindered shot from the floor, and he will be unable to pass down toward his basket if you are guarding him properly.

Finally—when guarding an opponent who is trying a shot or a pass over your head, put your arms up at an angle toward the ball, with your hands about 12 to 15 inches in front of your head. By using such an arm position you can stop the ball before it can go high enough to beat you!

NOTE: His basket is the one your opponent is shooting at and the one you are guarding.

### Keep Calm — Play Better!

Most leading authorities claim that getting angry or emotionally excited in a game creates more detrimental effects than helpful ones. When you get angry and excited you develop more physical power and drive for a short time. But the trouble is that you lose a certain amount of balance, nerve control and the other finer workings of your body. Then too, fear and other high emotional states are harmful to the digestion and other important functions of the body. Yes, there is no doubt about it, the best bodily state for efficient action is to be calm, cool and relaxed with your determination and desire driving you to greater attention, greater concentration—not wild outbursts of power.

If you have not yet joined Sports College, make a note to do so today and become eligible to send for the many new Sports College instruction bulletins now available, and participate in the many other helpful services. Remember—membership is free, and is open to everyone regardless of age, where you live or what your interest is. Just send a note saying you want to join to: Sports College, Box 99, Toronto 1, Ontario—we'll do the rest.

## Canada Ranks High With Frenchmen

MONTREAL.—Fulgence Charpentier, Canada's information officer at the Paris Embassy, returned to Canada with reports that Canada ranks higher in the French mind than any other country in the world.

The average Frenchman feels this country will be "the big country" before this century is out, he said in an interview.

Niagara Falls giant Hydro-electric plants account for nearly half of the total water power capacity of New York state.

## On The Side : E. V. Durling

It is said the best way to relieve the sadness because of the loss of a dog is to get another pup as soon as possible. Ross Lewis, proprietor of the world famous Cavendish Hotel of London, followed that advice for 50 years. She always had a white terrier named Tippy. When one Tippy passed on he was immediately succeeded by another white terrier, also called Tippy.

### Language of Flowers

In Tahiti the girls have a language of flowers all their own. A flower behind the left ear means, "I am looking for a sweetheart." Behind the right ear, "I have a sweetheart—stay away." Flowers behind both ears, "I have a sweetheart but I'm looking for a better one." If you were in Tahiti, young woman, how would you be wearing the flowers? Perhaps there should be a similar sign language in use in this country.

### Preference For Swedes

"May I offer my opinion of those boorish foreign-born bachelors who think they know all the answers?" writes a bachelorette. "I am of Italian descent. I wouldn't marry either a Frenchman or an Italian. They are too bossy, too disgustingly dominating. No Irishman for me, either. They are married bachelors. Want a minimum of four nights out with the boys. As for Englishmen, they are bores, also of a chilly nature, all nerves, no passion. Americans, of the present generation, want to go for a husband, a tall, out to work and bring home pay checks. Give me for a husband, a tall, considerate, virile, home-loving, ambitious Swede."

### Jungle Drunkards

Jungle animals often get drunk on purpose. They become inebriated by eating fruit that has fermented in the sun. The lions and elephants enjoy getting tight and are usually good natured when drunk. The worst jungle drunkards are the monkeys and the baboons. When drunk, a baboon is in a fighting mood. If he can't find another animal to battle, he will start fighting with his shadow.

### From Mother to Daughter

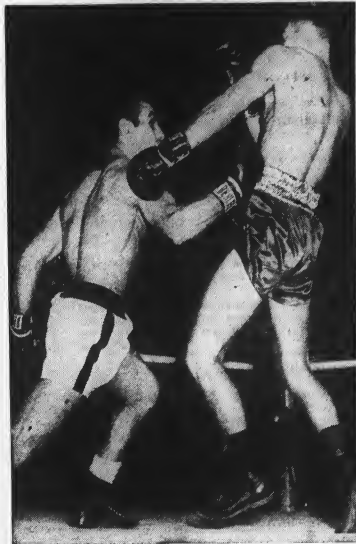

Said Lady Chatterfield to her daughter, "My child, anything worth doing is worth doing well. If you decide to let a young man kiss you, respond enthusiastically. Nobody likes to kiss a rock."

### Lowering the Standards and Cost

For the coming crowning of Queen Elizabeth the coronation robes of the royal family will be, as usual, trimmed with ermine. However, it seems they will be the only participants to feature this luxury. The coronation robes of the duchesses, countesses, marchionesses, etc., will be trimmed with rabbit. A robe trimmed with ermine costs around \$2,500, one trimmed with rabbit about \$500.

### Simplified Housekeeping Has Its Own Problems

As time goes by housekeeping continues to be made much easier by the cleverness of male inventors. Soon taking care of a home and family will be just a push button proposition. Wives will have much time on their hands. This will present a grave problem to husbands who will have to devise means of keeping their wives out of mischief, such as losing the housekeeping money, playing canasta or the races.

TAKE THAT—Armand Savole, Canadian lightweight champion, delivers a crushing blow to the ribs of Glen Flanagan of St. Paul in their recent bout at the Montreal Forum. Savole won a unanimous decision in the 10-round affair.

## Canadian Weather Stations Cruise Daily In Pacific

OTTAWA.—Every day of the year, Station P also is equipped to go to a converted wartime frigate to help distressed ships and aircraft.

Ocean about 1,000 miles west of Vancouver. Behind this routine voyage is the story of Canada's floating weather stations.

The 10-mile square is the centre of a network of ocean stations for weather information. A day aboard the 300-foot-long by 37-foot-wide ship at Station P is divided in much the same way as the land-between-work, recreation and sleep.

Work may mean the taking of regular weather observations—eight surface reports, four of the upper winds and two upper air reports including air pressure, temperature and humidity.

Wind reports require the release of a hydrogen-inflated balloon with a reflector attached so that it can be tracked by the ship's radar and its course plotted on the map.

The reports serve to advise armies and mariners of storms or of favourable winds.

Although collecting the weather data is the primary job, the ship at

## National Hockey League

### Black Hawks Using Penalty Box More This Season — Eric Nesterenko Is 6 Feet 3 Inches Tall

Should Score 200th This Season—Gordie Howe should score his 200th National League goal this season. The big Detroit right winger started the current season with 160 goals scored and had tallied 25 this season in games up to the morning of January 15, which brought his goal total to 185. The 1951-52 Hart Trophy winner also stands a good chance of fracturing Maurice Richard's record of 50 goals in one season. Howe is a notoriously slow starter and always garners his biggest goal output towards the close of the season.

### Ukrainian Descent

Eric Nesterenko, Toronto Maple Leafs 19-year-old discovery, is a big boy. Eric stands almost six feet-three inches in height and weighs 180 pounds. He was born in Flin Flon, a northerly Manitoba town, and moved to Toronto with his mother 10 years ago. Both his mother and father were born in the Ukraine.

### Patrick Lends Mortson Nose Guard

Coach Lynn Patrick of the Boston Bruins lent Gus Mortson, Chicago defenceman, the guard that the Hawk defenceman is wearing to protect his broken nose. Mortson has to wear the nose protector for several games, and without such a protector he would be sidelined.

### Leafs Are Howe's "Cousins"

Toronto Maple Leafs, whether they know it or not, are "cousins" to Detroit's Gordie Howe. The League's leading goal scorer notched almost half of his 25-goal output up to the morning of January 15, against the Leafs. He scored 10 of his 25 goals against Toronto, six against Chicago, five against Boston, three against Rangers, and one against Canadiens.

### Detroit's "Red Eye"

Jim "Red Eye" Hay, Detroit Red Wings' likeable young defenceman, picked up the unusual nickname of "Red Eye" as a result of having pink eye as a youngster.

### A Cousin of Bep's

Aldo Guidolin, 20-year-old rookie

playing on New York Rangers' forward line of Guidolin, Don Raleigh and Dean Prentice, is a cousin of Bep Guidolin. Bep played with Boston, Detroit and Chicago in the National Hockey League.

### Hawks Show Increase in Penalties

Chicago Black Hawks have increased their minutes in the penalty box by a goodly margin this season over a year ago. Chicago ended the 70-game regular season last spring with a total of 627 minutes in penalties. This season after 42 games the Hawks were the second-most penalized team in the N.H.L. with 490 penalty minutes. They should surpass last year's total by a hefty margin.

### Herry Likes Chicago

Wally Hergesheimer, second highest goal-getter in the National Hockey League, enjoys playing most against Chicago Black Hawk. The diminutive New York right winger scored seven of the 20 goals he'd registered up to the morning of January 15, against the Hawks. He scored four against Toronto, four against Boston, four against Detroit and one against Montreal Canadiens.

### Referee Played in American League

Jerry Olinski, newest addition to the National Hockey League refereeing corps, is a former hockey player himself. Olinski played a season with Indianapolis Caps in the A.H.L. before turning to officiating.

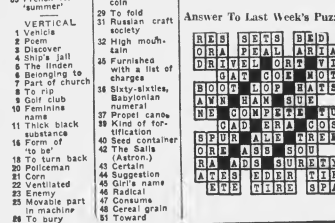

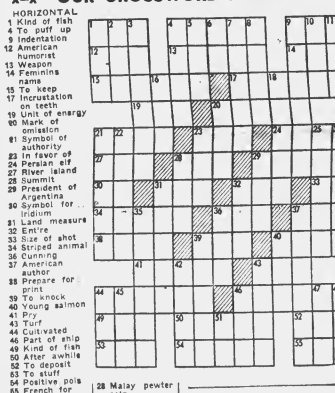

Two strongest earth shocks recorded since the use of seismographs, around 1900, were the Assam-Tibet quake of Aug. 15, 1950, and the Colombia temblor of 1906.

### Weekly Tip

#### DRYING KNITTED RAYONS

When drying knitted rayons, smooth out wrinkles with the fingers. If dried smoothly, they will need no pressing.

Subscription Rates \$3.00 per year, Foreign \$4.00 per year. Single 7c

### COLEMAN PROPER, NOT JUST MAIN STREET

Checking the files of the past twenty years one thing is evident . . . those areas outside Coleman centre are not getting their news into the paper. For this reason we make the following statement. "The Journal is a paper serving each and every section of the Coleman area . . . East Coleman, West Coleman, and Willow Drive to mention a few. However, it all can not be done by two men with multiple duties".

With this in mind we have endeavored, in the time allowed, to contact people in all sections. We have been fortunate to have a correspondent in East Coleman and the promise of another, but we need information from all centres. If you have any news just give us a ring on the phone before noon on Mondays. You will be surprised how much better a paper can be with the people behind it.

The Coleman Journal is not a paper for and about those people who live in the area surrounding the main street. The Coleman paper is your paper and will be only as good as you want it to be.

### ONCE AGAIN

The only public announcement locally to date regarding aid to sufferers in England and the Netherlands has come from the Salvation Army. Perhaps other organizations are working towards this end, but are apparently hiding their light under a bushel.

Once again the Sally Ann is apparently taking the lead. In time of war or peace this group is always among the first to come to the aid of those in need. We should remember them when the Red Shield campaign begins this year. They remember the suffering year around.

Perhaps the work of the Army is more noticeable by those who have the combined duties of having served in the army and the duties that take them to the police courts of the large centres. It is then that the work of the Army is noticed.

However assistance by the Army does not stop with national emergencies, wars, hospitals or police courts. It goes on right in your own town. Have you an idea as to the amount of money that is spent by the local group in giving meals, and assistance to the destitute or people in temporary need?

## THE COUSIN'S STORY

*A History Of The Crows Nest Pass Area*

In the meantime at the other end of the Pass Wm. Fernie, of Fort Steele and Lieut.-Col. Baker, then a member of the B.C. Legislature, acting on the information supplied by Michael Phillips, began prospecting in the Elk Valley in 1887. Every summer until the railway was built they took men out of Fort Steele to prospect the outcrops and succeeded in forming a syn-

dicate in Victoria to develop the coal lands. This was followed by the organization of a company to build the B.C. Southern Railway. Little progress was made however until the formation of the C.N.P. Coal Co. in 1897.

There were two sources from which agitation for the building of a railway through the Crows Nest Pass originated. One was Victoria, B.C. in general, for the mining development of the Kootenays in the seventies had been northward from Montana and Idaho, while the people of the coastal area had been cut off their own hinterland. This draining of wealth southward seemed as if it would increase as the Great Northern was being built westward. James J. Hill planned feeder lines north into Canada, so Col Baker and his company led agitation from the British Columbia side to cut off Hill's tentacles.

The other centre of agitation was the ranching area around Macleod and Pincher Creek. The possible market for ranch cattle was one factor, but the fear of being left at a dead end was obviously another, especially after the building of the Canadian Pacific through Calgary and the apparently dead top of the line from Medicine Hat at Coalbanks (Lehrbridge). Every bit of publicity favorable to the building of a railway through the Pass was published. Violent arguments were printed refuting the claims of those who favored the Howse Pass setting forth the merits of the southern pass. It reads strangely like the arguments used in 1940 to influence the Canadian and Alberta and B. C. governments in the building of a proposed Trans-Canada highway.

There were rumors of Cana-

dian Pacific surveys being in the Pass in 1888. A coal oil "spring" was discovered by W. S. Lee in the Pass, which was later proved to be "true petroleum, purer than Pennsylvania oil". In 1890 it seemed certain that the line would be built in 1891. Notice was taken of the fabulous silver lodes in the Kootenay and of Col. Baker's holdings near his home in Cranbrook, and of his trip to Britain to try to gain support there.

In the meantime, John Nelson, a North Fork rancher, discovered "genuine coking coal" along the middle fork near the falls, and set about forming the Alberta Coal and Coke Company. Reports on the progress of Baker's Crows Nest Coal Company were given

frequently. By 1890 several railway charters had been applied for, Galt's Northwest Navigation and Coal Company being one application.

This company was granted 3840 acres of land by the government for the project. It was reported in 1891 that the Prime Minister, Sir John A. Macdonald, had delayed the line because the route was too important to hand over to a company. So the years passed with one disappointment after another, but in spite of the companies sparring for time, the settlers went ahead hopefully. H. D. Freemantle advertised coal from the Spring Creek Mine on the Middle fork, and a company was formed to develop the Kootenay oil spring.

## The People Speak

The following answers were given by people of Coleman when asked by the Journal how they would like to see the town mark its 50th anniversary.

**Businessman**—By all means celebrate it. It could take the pattern of many ideas and incorporate the rodeo as a part, but only a part.

**Professional Man**—I would like to see an open house atmosphere. When and if the old timers come back to celebrate I would like to see them welcomed as guests. With the shortage of accommodation we should welcome them to our homes as friends not as paying guests. I would like to see a real festive spirit during the week when we could have such things as sports nostalgic of the old days such as football. We could arrange to take the visitors on a tour to show the changes of the past years. Show them that Coleman has changed and progressed while they have been away.

Man on the Street—Well if we

don't celebrate it now I don't think many of us will be around for the 100th anniversary, especially those people who helped to build the town.

Various people have answered the question with suggestions for a local variety program to fill the breach for at least one night. Suggestions have ranged from such things as having the Italian people organize 1 night's celebration and Polish people another. Also coming to light was the fact that music festivals in past years has never seen Coleman take a back seat to any district.

The chain of thought showed possibilities of a "Coleman Variety Night" or drama night with one act plays from points from Fernie to Pincher Creek, if action was taken soon enough.

One opinion was that such an endeavour would give a local touch to a local celebration. Should a good profit be derived, two-thirds would not leave the district by this show.

Hey, Mr. Merchant  
that's a customer  
slipping away!

and 30 percent of your  
business leaves with it  
every year

Hard to believe, but true. If yours is an average business you normally LOSE approximately 30 percent of your customers yearly. Look through last years accounts and see how many are no longer active.

### Why do you lose them?

Through death, hard feelings, moving or through the efforts of hard driving competitors. Some of these are beyond your control.

At the same time there is a normal increase of 4% every year. That leaves you facing a 26% handicap every year.

### What to do about it

The answer lies in better merchandising, better planning, more vigorous promotion of fast selling goods and services

The surest, most profitable sales promotion is consistent timely advertising in

**AFTER 42 YEARS A CRIPPLE, HOUSEWIFE MAY WALK UNAIDED**—Ever since she was stricken with polio as a 13-month-old baby, Mrs. Winnifred Mudie of Oshawa, Ont., seen above with son Teddy, has been unable to walk without a heavy brace and a three-inch cork sole shoe. Today, at 43, she believes with a faith that is humble that at last she will walk normally without artificial aids. The reason for her hope is a series of operations which began last August. It was then that the Rotary club of Oshawa stepped in to help out. When Mrs. Mudie needed to have her brace and shoe fixed, the club offered to have her examined in Toronto as well. And it was here that the doctors discovered there was still some life left in her right leg which up till then had always been completely useless. The doctors have since told Mrs. Mudie there is no reason why she won't be able to walk eventually without crutches or braces.—Central Press Canadian.

**DIGS, DEEP INTO ANCIENT HISTORY**—Dr. George F. Carter, chairman of the Ishih Bowman School of Geography at Johns Hopkins university, at Baltimore, Maryland, claims to have "definite proof" that human beings existed in what is now the U.S. more than 100,000 years ago. Carter is seen with rock fragments which he says he is certain were used by perhaps the earliest humans in America, over 100,000 years ago—or about 50,000 years earlier than other archaeologists estimate man was on the continent. Dr. Carter theorizes that the small pieces of rock were broken from sources similar to the large rock, and then deliberately chipped to form crude chopping and scraping instruments. Having found dozens of such artifacts near San Diego, California, in gravel deposited by streams between the third and last glacial advances, Dr. Carter thinks they were used by primitive men and later eroded from canyons by streams to be carried to the spots where they were found.—Central Press Canadian.

**BULLETS NOW, BIBLES LATER**—Sgt. Robert Christopoulos of Seaside, Calif., is nearing the end of his army mission to shoot and kill in Korea, but he will go back again to spread the Christian religion among the Korean people. Sgt. Christopoulos will use a helicopter in his missionary work, dropping from the sky at points inaccessible because of bad roads. He is a minister of the conservative Baptist Church and plans to return to Korea as a missionary of Youth for Christ.

**CARRYING ON FRENCH TRADITION**—In a colorful ceremony at the Presidential Palace in Paris, French President Vincent Auriol exercised the prerogative given to only five countries in the world by placing the "Barette" on the head of newly-named Cardinal Angelo Roncalli, who was elevated to the sacred college in Rome by Pope Pius along with 22 other prelates. This is one of the "rights" the French republic has inherited from the old monarchy. Roncalli is kneeling on red cushion used in the coronation of King Charles.—Central Press Canadian.

**EARL AND BRIDE CHOOSE CORSIKA FOR HONEYMOON**—The Earl of Dalketh and his bride, the former Jane McNeill, are shown relaxing on the rockbound coast of Corsica during their honeymoon, following their wedding in Edinburgh, Scotland, one of the most brilliant seen in Britain in years. The earl, once mentioned as a possible suitor for the hand of Princess Margaret, is the son and heir of the Duke of Buccleuch. The bride, daughter of a Hong Kong lawyer, appeared as a fashion model during the Festival of Britain.—Central Press Canadian.

**WRENS INVADE NO-WOMEN'S-LAND OF THE R.C.N.**—Invaders into what was historically a no-women's-land of the Canadian navy, these nine Wrens have established themselves at HMCS Shearwater, the naval air station at Dartmouth, N.S. There they are training cine assessors and air-control tower operators. Left to right, rear row: Audrey Beckwith, Vancouver; Verna McDougall, Calgary; Serana Antoine, Cornwall, Ont.; Elizabeth Rees, Belleville, Ont.; Vivian Kay, Hamilton, Ont.; and Dorothy Turner, Regina, Sask. Front row: Berni Krupski, Melville, Sask.; Sylvia Cunningham, Calgary; and Lily Collins, Durham, England.—Central Press Canadian.

**GERMANY'S ONLY SIAMESE TWINS TO BE SEPARATED BY SURGERY**—Mrs. Kurt Knaak of Durschedorf is shown holding her twin daughters, Gitta and Lette, believed to be Germany's only Siamese twins. Now 18 months old, the twins are joined at the head, but examination has determined that they have separate nervous systems and separate brains. Parents have given consent for surgery, scheduled for the summer, to separate the girls. Dr. Peter Roettgen, leading West German brain specialist, is said to be planning the operation.—Central Press Canadian.

**"WORK FOR NOTHING" SAY DAIRY FARMERS**—An outbreak of the hoof and mouth disease that struck Western Canada last year is the surplus of milk and dairy products in Southern Ontario. Unable to sell their cattle to the U.S., many farmers have turned to milk producing, glutting the market. Norman St. Rutledge, Cookville, Ont., is one of the hundreds of farmers who say they are "working for nothing."

**MARAUDER ENDS CAREER MOUNTED ON MANTEL**—When suna leur taxidermist, Mr. Joe Moore, seen above, of Springbrook, Ont., mounted a killer owl which was fatally shot when it swooped out of the sky and attacked a large cat, bludgeoning it to death with blows on the head from his strong book, he found two dozen quills embedded in the head and body of the bird. Apparently the owl had attacked porcupines at various times and as a result one of the quills, sticking in the bird's head, was pressing against the vital nerve, causing the owl to go mad with a lust for killing bigger animals. The owl, fully grown, with a wingspread of over four feet weighed about four pounds, two pounds lighter than the cat he was trying to fly away with.—Central Press Canadian.

**ONE OF 10 GUIDES TO REPRESENT CANADA AT CORONATION**—One of two girls representing Ontario, sixteen-year-old Frances Panabaker of Ancaster will be among 10 Canadian Girl Guides to attend coronation next June in London. A student at Westdale secondary school, she was chosen by Commonwealth Youth Organization.

**TITO BECOMES FIRST PRESIDENT OF YUGOSLAVIA**—Taking the oath of office before the Yugoslav parliament in Belgrade, Marshal Tito became the first president of his country, a post created as a result of constitutional changes. Tito was elected by a vote of 568 to 1.

Mrs. Edith Bryant will be the speaker.

### In Memoriam

MICHALSKI—In loving memory of our son, Eric Michalski, who passed away in February of 1950. Sheltered on the rock of ages. Anchored on the golden shore. In the loving arms of Jesus. Rests our loved one evermore. Fondly remembered by Mother and Dad, brothers and sisters.
